PARK

Formula HYSY

On Saturday 8th of September at 4,30 p.m. at Oval Lingotto the AUTOECO event hosts the second edition of Hydrogen scooters Gran Prix by Environment Park

Torino, 8th September 2007. A new appointment in Turin with **Formula Hysy**, the Gran Prix for hydrogen-fueled scooters. After the successful appointment held on the end of June, when the first exhibition of the race was kept at Parco of Valentino on the occasion of the Eco-Efficiency Biennial, **on Saturday 8th of September at Oval of Lingotto from 4.30 p.m.**, Environment Park will re-propose the challenge in a indoor version into the AUTOECO event.

Free access for all the audience..

This time the “drivers-for-a-day” will be 16 personalities of the vehicles Italian design world (a.e. Roberto Giolito – brand new Fiat 500’s daddy, Gianandrea Fabbro - Ducati 999 creator, Marco Tencone - Lancia Musa’s design responsible, Marco Lambri - new Piaggio MP3 head designer...) and 16 personalities of Turin coming from political and cultural world (a.e. Mario Calderini – president of Finpiemonte, Guido Bolatto - Camera di Commercio Torino’s secretary, Andrea Bellini – director of Artissima, Andrea Bairati – Councillor for University and Scientific research, Domenico Mangone – Councillor for the Environment ...), which will compete once again for the “green benefits” offered by the City of Turin. This time too the three first classified will win the chance of indicating some public spaces where to **plant 15 trees**: 7 for the first classified, 5 to the second and 3 to the third one.

The competitors will challenge along a small circuit into the Oval riding the Hysyridres, projected by Hysylab laboratory of Environment Park and whose “racing” version was studied by the Istituto d’Arte Applicata e Design - Torino (IAAD) and realized by the I.DE.A Institute.

Around the box area, waiting for getting into the saddle to challenge each other, there are going to be again well-known personalities of the political and cultural world of Turin, councillors, presidents and managing directs of public and private enterprises and, for the first time, designer from the transportation field and leading figures from their world.

Partner of the event, with Environment Park, with the Istituto d’Arte Applicata e Design - Torino (IAAD) and Autoeco, will be the OSBE realizing for the event the crash helmets for the race.
